# Assignment Submission Posts

You will need to create 3 posts for this assignment on the hlth5200.trubox.ca site.

The following guide illustrates the fields to complete or fill in, in the Submission form on the site, for each of the posts.

Best Practices When Using the Website

- Use Chrome or Firefox browsers to access the website

- Avoid trying to upload images or files from a mobile device.

- Do not upload .mp4 video files directly. Upload your video to Kaltura first.

- Draft any comments or responses in a document first and then copy it into the site when you're ready to post it. That way, if there's a glitch when posting, you don't lose your work.

- Be patient! Once you click the Submit button, it may take a bit of time to process your post

- If you experience any error messages, refresh your browser tab and check the site to see if your post was successfully posted. If there are issues, please reach out to your TA.

- This video (4:49 minutes) provides a quick overview of how to create a post on the site.

1. Video Post

The submission form fields to complete or fill in:

FEATURED IMAGE FOR YOUR POST ✓

Choose File | No file chosen
